Machinery & Engineering Services

PREOWNED DTM Packaging- Automatic Bottle Unscrambler model BU 7100

Construction Features:

- Heavy duty stainless steel welded frame
- Adjustable positioning on most systems to minimize change parts requirements.
- 48 in diameter pre-feeder will accommodate a wide range of containers
- Air jet bottle reject system in pre-feeder to minimize damage on wrongly positioned containers.
- Hand wheel adjustable spacing belt to facilitate changeovers.
- Calibration markings, labels and indicators to help document changeovers.
- Bottle turning by pneumatic actuator to guarantee production speeds.
- Pre-feeder built at an angle to minimize bottle damage.
- Single hand wheel adjustment
- Main belt system powered by $\frac{3}{4}$ Hp motor.
- Bottle handling from left to right.
- Low electric and pneumatic consumption.
- **30 cubic feet stainless steel hopper with 18 inch feed belt is standard.**
- Hopper service door
- Can work on existing or new conveyors.
- Front protection by 3 polycarbonate sliding doors.
- Leveling by mounting screws.
- Speed control on all motors installed on machine.
- Automatic bottle counter.
- Easy access Start & Emergency stop.
- Safety disconnect switch installed on electric panel.

Electric and pneumatic requirements:

- 110 Volts, 60Hz, 15 Amps
- 15 CFM @ 80 p.s.i.
