

DTM Packaging -Automated Assembly Machinery

Our Custom Automation Division has built a variety of automated equipment such as web handling and piece part assembly machinery. Formats include Rotary Dial and Linear systems using continuous and intermittent motion. Our equipment will meet your needs for high speed, high precision and accuracy, and reliable automated production.

Dual sided laminator with unwind tension control & integrated web cleaner

SCARA based automotive part E-test machine with (3) DVT vision systems, serialized tracking, electrical functional test, stylus part marking, and custom DAQ (Including report generation & archiving to CD)

Medical product assembly machine with part carousel/servo elevator, multiple bowl feeders, ultrasonic welding and multi-stage leak testing
